Participant Guide, Day 3: Put it together, then prove it

Wednesday 4 November 2026 | 08:30 to 12:45 | Fictional airport

Today's goal

You see the whole system in one picture, you leave with five actions for your own department, and your team delivers a verified one-page brief for the airport director.

Agenda

Time	Block
08:30	Recap and quiz
08:45	Putting it together
09:45	Teams and scenario cards
09:55	Lab 7: Capstone (break 10:30 to 10:45)
11:30	Team demos
12:10	Results, Monday morning, close
12:45	End

The seven scenarios

#	Scenario	The director asks
1	Friday evenings	Full case: waits, counters, missed flights, cost, rules broken, fix
2	Late airline	Which airline gets a warning? What happened to its rebates?
3	Where to add a flight	Which route, which incentive, what revenue upside?
4	Two problems in Terminal 2	Wi-Fi and queues are both low. Which first, and why?
5	Did the smart gates work?	Compare before and after 1 July 2026. Expand?
6	Shops under review	Which outlets under-perform? What is the effect of queues on spend?

#	Scenario	The director asks
7	Complaints and the rulebook	Targets met? Which categories are systemic? What must we report?

The one-page brief

- Headline: one sentence, the finding and why it matters
- Key numbers, each verified by your own SQL
- Rules: document, clause, requirement, what we observed
- Three actions, each with an owner and a deadline
- Assumptions and limits

Rule: a number you cannot reproduce does not go in the brief.

Time checks

Time	Where your team should be
10:30	Starter questions done
11:00	Three numbers verified
11:15	Brief written
11:30	Rehearsed once

The three-minute demo

30 s the finding. 60 s the evidence: two numbers and one rule, with the clause. 30 s how we checked. 45 s the ask: three actions with owners. 15 s one limit.

Scoring

Criterion	Points
Finding is correct and clearly stated	25
Numbers verified with your own SQL	25
Rules cited with document and clause, approved version	20
Recommendations specific, with owner and deadline	20
Assumptions and limits stated honestly	10

My Monday-morning plan

1. One repeated question in my department: _____
2. The data and documents I would need: _____
3. The rule I must check first (data class, approved service): _____
4. Ten golden questions I will write: _____
5. Five pilot users: _____

Rule to remember

Under the airport's AI policy (GIA-POL-10), internal data goes only to approved services under paid terms, personal data never goes to an external model, every agent tool call is logged, numbers come from queries, and a named person is accountable.
